

MAHAMMAD RABBANI

Java Full Stack Engineer · Spring Boot · Microservices · Kafka · AWS

+91 7760375574 · mdrabbani8229@gmail.com · Hyderabad, India · [LinkedIn](#) · [GitHub](#)

PROFESSIONAL SUMMARY

Java Full Stack Engineer with 2.5+ years designing and deploying enterprise-grade microservices at Tech Mahindra and Virtusa, cutting API latency by 25–30% and processing 10K+ daily Kafka events in production. Deep expertise in Java/Spring Boot backend architecture, AWS cloud deployments (Lambda, ECS, RDS, S3, API Gateway), and CI/CD pipelines — consistently delivering systems that are faster, more fault-tolerant, and built to scale.

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML, CSS

Frameworks: Spring Boot, Spring Security, Hibernate, JPA, Microservices

Cloud & DevOps: AWS (Lambda, ECS, ECR, RDS, S3, API Gateway, EC2, CloudFront, Elastic Beanstalk), Docker, Jenkins, CI/CD

Messaging & Data: Apache Kafka, MySQL, Redis

EXPERIENCE

Virtusa

Jan 2026 – Present

Software Engineer — Microservices & Backend

Hyderabad, India

- Reduced inter-service latency by 30% by architecting asynchronous event-driven workflows using Apache Kafka producers/consumers, processing 10K+ transactions daily across distributed microservices.
- Improved API throughput by 25% by implementing Redis caching strategies and optimizing complex multi-join SQL queries, eliminating N+1 database calls in high-frequency paths.
- Drove 99.9% service uptime by engineering fault-tolerant distributed systems with Resilience4j circuit breakers, retry mechanisms, and centralized Spring Cloud Config management.
- Accelerated team delivery velocity by 20% by leading end-to-end microservice integrations — service discovery (Eureka), API Gateway routing, and Docker-based cloud deployments on AWS ECS.

Tech Mahindra

Dec 2023 – Dec 2025

Software Engineer — Full Stack (Angular + Spring Boot)

Hyderabad, India

- Delivered 50% of a greenfield Material Handling System from design to production using Spring Boot microservices and Angular in an Agile squad of 8, serving 200+ warehouse floor operators.
- Accelerated data retrieval by 35% by redesigning the MySQL schema with optimized indexing and rewriting slow Hibernate ORM queries, reducing dashboard load times from 4.2s to 2.7s.
- Improved API response times by 25% through microservices decomposition, containerizing 6 services with Docker, and introducing Spring Cache for frequently-accessed reference data.
- Eliminated a critical JWT authentication vulnerability in a legacy Spring Security system, resolving token refresh race conditions and hardening role-based access control for 500+ users.

PROJECTS

Job Search Portal | Spring Boot · JWT · AWS RDS · ECS/ECR | Oct 2024

- Engineered role-based authentication with JWTs, supporting distinct Admin and Candidate flows; deployed a containerized backend on AWS ECS and ECR with RDS (MySQL) for production-grade persistence.

CitiCore Banking Platform | Spring Boot · MySQL · Docker · Jenkins · AWS ECS | 2025

- Architected and deployed a Citibank-inspired microservices banking system featuring account management, fund transfers, and transaction history — containerized with Docker, deployed on AWS ECS, and automated via Jenkins CI/CD pipelines with zero-downtime rolling updates.

E-Commerce Application | React.js · Spring Boot · MySQL · AWS S3 · Elastic Beanstalk | Sep 2023

- Launched a full-stack shopping platform with RESTful APIs, admin product management, AWS S3 asset storage, and auto-scaled deployment on Elastic Beanstalk; reduced deployment time by 60% vs. manual EC2 setup.

EDUCATION

B.E. Computer Science & Engineering

Bheemanna Khandre Institute of Technology, Karnataka

Apr 2019 – May 2023

ACHIEVEMENTS

- Awarded the Bravo Award for exceptional performance — the top individual recognition at the prior organization.
- Attained Level 7 on Coding Ninjas competitive programming platform; District Chess Champion.

CERTIFICATIONS

- IT Freshers Java L1 V1 — Tech Mahindra
- Java Full Stack Development — KodNest Technologies
- Full Stack Java Developer Course — ExcelR
